

CELL-KLEEN™ HD2

Deep-Cleaning Anilox Roll Cleaner

FEATURES/BENEFITS

Features

- Clings to vertical surfaces
- Deep cleans
- Effectively removes camouflage

Benefits

- Economical: 1 gallon cleans up to 10 rolls
- Cost and labor reductions
- Improved print quality
- Extended roll life
- Leaves no film or residue after rinsing

Cell-Kleen HD2 is available in 6 gallon pails, 55 gallon drums, totes and bulk deliveries.

Description

Cell-Kleen HD2 is a viscous cleaner designed to deep clean water- and solvent-based inks from anilox rolls. Because of its thixotropic properties, *Cell-Kleen HD2* can be applied either on press or off and will allow for increased dwell time on the roll without dripping down onto other sensitive press components. *Cell-Kleen HD2* will penetrate deeply into the cells and clean them like never before. By using *Cell-Kleen HD2* to routinely clean anilox rolls, the frequency with which rolls need to be sent out for reconditioning will be greatly reduced and print quality will be greatly improved.

Directions for Use

Apply *Cell-Kleen HD2* with a brush or coarse spray and let dwell for 15 to 30 minutes. In a very short time you will see the ink rising to the surface. Some agitation with a stainless steel or brass brush may be required depending on soil conditions. Thoroughly rinse with water, or remove with a clean damp rag if cleaning is being done on press.

NOTE: *Cell-Kleen HD2* should not be used on tin, aluminum or other soft metals.

IMPORTANT: Before using *Cell-Kleen HD2*, always be sure to read and follow precautions and directions on the product container label and MSDS. (Apr04)
