

GENERAL PRODUCT

PROTECTIVE CREAMS 211, 311, 411

Industrial Grade Hand Care Creams

FEATURES/BENEFITS

Features

- Repels soils from skin pores
- Invisible barrier to irritants
- Protects rather than treats

Benefits

- Hands wash up easily and fast
- Decreases dermatitis and other skin irritations
- After drying, does not affect grip

Protective Creams 211, 311 and 411 are available in cases of 24x8 oz. tubes.

Description

Protective Creams 211, 311 and 411 were developed for use in heavy industrial environments where hands are exposed to numerous irritants.

Protective Creams 211, 311 and 411 are formulated for different types of conditions, such as, working with solvents, acids or chemical cleaning products. No other hand cream can compare.

Typical Use Directions

PROTECTIVE CREAM 211: Aides in repelling dust, dirt, grime and similar abrasive irritants.

PROTECTIVE CREAM 311: Aides in repelling various acids, alkalis and other skin irritants contained in water solutions.

PROTECTIVE CREAM 411: Aides in repelling many petroleum hydrocarbons, chlorinated hydrocarbons and other organic solvent irritants.

NOTE: *Protective Creams 211, 311 and 411* are not a substitute for protective gloves or garments.

IMPORTANT: *Before using PROTECTIVE CREAMS 211, 311 and 411 always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Mar04)*
