

CITRIKLEEN[®] AEROSOL

Biodegradable Industrial Strength Cleaner

FEATURES/BENEFITS

Features

No CFC's

No chlorinated or petroleum solvents

Citrus fragrance

Water rinsable

Quick degreasing

Benefits

Environmentally safer

Non-toxic

Economical

Versatile

Pleasant and easy to use

U.S. Patent 4,511,488

Canada Patent 1,222,425

Citrikleen Aerosol is available in 24 x 16.5 oz. cans per case.

Description

Citrikleen Aerosol is a biodegradable, water-rinsable cleaner/degreaser formulated with an organic, non-petroleum organic solvent. It also contains an emulsion/surfactant system to emulsify and saponify oils and greases for rinsing or wiping away.

Citrikleen Aerosol replaces environmentally destructive products that are typically sold over the counter and that deplete ozone and pollute the air. *Citrikleen Aerosol* penetrates on contact. It provides powerful cleaning and degreasing action, quickly loosening dirt and grease from metal, ceramic and vinyl tile, chrome, rubber, cement, glass, and washable painted and unpainted surfaces.

Directions for Use

Shake well before spraying. Hold can upright 6 inches away from the surface to be cleaned. Spray thoroughly and allow time to penetrate. Simply wipe with damp cloth, brush, rinse with water or blow dry.

Applications

The cleaning/degreasing ability of *Citrikleen Aerosol* makes it ideal for uses ranging from the office to the heavy maintenance shop.

Typical Uses

Utilities - transformers, gear cases, fuel oil spills, floor spots

Refineries - pumps, crude spots, trucks, offshore platforms

Steel mills - gear cases, housings, vehicles, motors, parts

Automotive - engines, valve covers, road tar, alloy rims

Machine shops - small parts, nuts, bolts, workbench tools

Printing - press rollers, blankets, ink fountains, impression cylinders.

IMPORTANT: Before using CITRIKLEEN AEROSOL, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Aug02)
