### Description

*Penetone 2406* is a clear green, nonphosphated liquid detergent consisting of a mixture of synthetic detergents, chelating agents, alkalies, and water soluble solvents in a water.

*Penetone 2406* is a multipurpose detergent for use on all metal surfaces except aluminum, tin and zinc. For example, at a leading pharmaceutical plant it is used to clean stainless steel screens and filters without leaving soap film or other residues. It can be used for a variety of cleaning operations where a free-rinsing, highly active detergent is needed for moderate to heavy soil conditions.

### Typical Use Directions (also see product label)

The method of use varies according to specific in-plant equipment availability and soil conditions. It can be applied in any of the following ways:

- By submersion of the parts in a tank holding a solution of *Penetone 2406*. The suggested operating temperature is 140°F and a dilution ratio of 1 part cleaner to 10 to 20 parts water.
- By wiping the parts with a one part cleaner to 20 parts water mixture.
- By spraying the parts with one part cleaner to 20 parts water mixture.

A thorough water rinsing of the parts after cleaning is recommended.

**IMPORTANT:** Before using *PENETONE 2406*, always be sure to read and follow warnings and directions for use appearing on the product container label and MSDS.
