### Description

*Penetize* is a powerful, quaternary ammonium disinfectant cleaner formulated to rapidly clean and disinfect environmental surfaces

### Typical Use Directions (also see product label)

#### As a disinfectant:

At a dilution rate of 2½ oz. per gallon of water *Penetize* can be used as a disinfectant, deodorizer, fungicide and virucide on walls, floors, and other hard surfaces such as tables, chairs and bed frames.

#### As a one-step sanitizer:

*Penetize* is an extremely effective one-step sanitizer. It cleans and sanitizes in water up to 1000 ppm hardness. This hard water tolerance is in excess of most potable water and will insure complete sanitizing action when used as directed.

Use *Penetize* for sanitizing and cleaning utensils, equipment, and other hard surfaces. For sanitizing add one ounce per gallon of water and thoroughly wet previously cleaned surfaces. Rinse with water.

#### As an industrial strength cleaner:

*Penetize* is an industrial strength cleaner which disinfects as it cleans. It is especially designed for institutions and industry. When used as directed, a single application removes dirt, and grime, disinfects and deodorizes hard surfaces.

**IMPORTANT:** Before using *Penetize*, always be sure to read and follow warnings and directions for use appearing on the product container label and MSDS.
