### Description

*Penetone CFW4* has been specifically formulated for paper machine felt and wire cleaning. Its detergents promote rapid penetration, removal and rinsing of deposits such as resin, dye, size pigments, slime, clay, starch and fibers. *Penetone CFW4* is particularly effective when used for continuous felt and wire cleaning, minimizing machine downtime.

### Typical Use Directions (also see product label)

*Penetone CFW4* may be used for general cleaning operations by manual, soak, circulation or pressure washing techniques. Dilute one part product with 10-200 parts of water, depending on the degree of soiling. Typical use concentrations: continuous cleaning - 300-800 ppm; batch washing - 1-5% by volume.

**IMPORTANT:** Before using *PENETONE CFW4*, always be sure to read and follow warnings and directions for use appearing on the product container label and MSDS.
