

PENSOLV™ L115C

“Stickies” Removal Solvent

FEATURES/BENEFITS

Features

- Safe on all dewatering equipment
- Contains no phenols, chlorinated or aromatic solvents
- Mild odor
- Ready to use - no mixing

Benefits

- Removes all types of “stickies”
- Extends wire and felt life
- Reduces paperwork - no SARA Title III ingredients
- Excellent on all machine clothing:
 - Wires
 - Wet felts
 - Dryer fabric
- Improves sheet quality

Pensolv L115C is available in 55 gallon drums, totes and bulk deliveries.

Description

Pensolv L115C is a solvent developed especially for paper mill wire and felt cleaning. Scientifically balanced, *Pensolv L115C* is highly effective in removing a wide spectrum of paper mill soils such as pitch, latex, resins and adhesives. It is designed for use in either continuous cleaning applications or batch cleaning for the removal of “stickies.”

Directions For Use

Pensolv L115C is to be used full strength. While the machine is running, pump *Pensolv L115C* from the holding tank and shower onto the wire or felt using a spray bar. *Pensolv L115C* can also be applied manually using a hand-held sprayer. Apply coarse spray directly to wire or felt under low pressure.

Note: *Pretest on parts to be cleaned before use.*

IMPORTANT: *Before using Pensolv L115C, always be sure to read and follow warnings and directions for use appearing on the product container label and MSDS.*
