

INHIBISOL™ OS

Ozone Safe Cleaning Solvent, Degreaser

FEATURES/BENEFITS

Features

- No flashpoint
- No residue
- High dielectric strength
- Very fast drytime
- Excellent cleaner
- Safe on all metal surfaces when used as directed

Benefits

- Safe to use where ignition sources present
- Used to clean electrical motors and parts
- One product cleans multiple soils

Inhibisol OS is available in aerosol cans, pails and 55 gallon drums

Description

Inhibisol OS Cleaning and Degreasing Solvent is an excellent replacement for 1,1,1 trichloroethane and HCFC 141b. *Inhibisol OS* will remove wax, oils, finger prints, adhesives in precision cleaning operations, both in a production or maintenance application.

Directions for Use

Inhibisol OS is to be used full strength in large or small portable covered dip tanks, and in coarse-spray, wipe or brush applications. Safe for use on all metal surfaces, including aluminum.

Typical Uses

- Electric motors
- Textile looms
- Small bushings and bearings
- Switches
- Jewelry
- Gauges and meters

Note:

Do not use Inhibisol OS in pressurized fluid handling equipment containing aluminum or galvanized metal parts. The product may craze or soften certain plastics - pretest before using. Test on rubber surfaces before using. Prolonged contact may cause rubber to swell.

IMPORTANT: Before using INHIBISOL OS, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Mar04)
