

PEN-STRIP[®] NPX

Nonflammable Paint and Varnish Remover

FEATURES/BENEFITS

Features

- No flash point
- Fast acting
- Chromate and phenolic free
- Used at room temperature
- Special surface barrier to inhibit evaporation

Benefits

- Decreased fire hazard
- High level of productivity
- No energy cost
- Versatile uses

Description

Pen-Strip NPX is an acid activated solvent paint stripper that will rapidly attack and loosen even the toughest baked on paint finishes. *Pen-Strip NPX* will strip virtually any paint or coating from its substrate. *Pen-Strip NPX* can be used in a mild steel tank with a lid to prevent solution loss caused by evaporation. Do not heat.

Typical Use Directions (also see product label)

Use full strength. Parts should be completely immersed until the paint is lifted from the surface. Remove parts and pressure rinse with water. (Do not add water to *Pen-Strip NPX* solutions).

NOTE: *Pen-Strip NPX* is safe on aluminum, bronze, chromium, iron and steel. *Prolonged immersion is not recommended on brass, copper, tin, zinc, cadmium and magnesium.*

IMPORTANT: Before using *PEN-STRIP NPX*, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS.
