

# PL-998™

## Acid Metal Cleaner/Treatment

### FEATURES/BENEFITS

#### Features

- Excellent detergency
- Non-fuming acid
- Removes heat scale
- Highly concentrated

#### Benefits

- Effective on tough soils
- Safer to use
- Lower use cost

*PL-998* is available in 15 and 30 gallon drums.

### Description

*PL-998* is a versatile acid based cleaner possessing heavy duty detergent properties and powerful acid metal conditioners.

*PL-998* is used in both production and maintenance applications.

#### Some Typical Production Uses:

- Cleaning and phosphatizing of steel prior to painting
- Stainless steel vat cleaning in food processing plant

#### Some Typical Maintenance Uses:

- Descaling of heat exchangers and air pre-heaters
- Heavy duty cleaning of tile and grout in a shower room
- Derusting of tools, nuts, bolts and hardware
- Aluminum etching and brightening

### Typical Use Directions (also see product label)

**Prepaint Steel Conditioning and Cleaning:** Mix *PL-998* at 5%-20% by volume, heat to 150°F. Immersion time will vary with condition of metal. Consult PENETONE for recommendations.

**Descaling and Derusting:** Mix *PL-998* at 10%-20% by volume. Heating to 150°F will accelerate cleaning. Application time will vary. Test to determine.

**Tile and Grout:** Foam apply at 10%-15% by volume. Use hot water. Allow 1-3 minutes dwell, rinse before dry. Apply from bottom up, rinse from top down.

**IMPORTANT:** Before using *PL-998*, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Jul04)
