

# PENETONE® 1107

## High Pressure and Steam Cleaner

### FEATURES/BENEFITS

#### Features

Qualified to AMS-C-22542  
Safe on all metals  
Prevents clogging of steam coils  
Versatile uses  
Free rinsing  
Non-flammable  
Biodegradable

#### Benefits

Economical  
Reduces man-hours  
Can be used with hard water  
Will not harm painted surfaces

*Penetone 1107* is available in 5 gallon pails and 55 gallon drums.

### Description

*Penetone 1107* is designed for high pressure cleaning, but it is also excellent for steam cleaning, mop, spray, brush or wipe applications.

Its heavy duty action enhances cleaning on any hard surface where mud, oil, grease and dirt are a problem, making it ideally suited for use in rework facilities handling heavy construction equipment, trains, buses, trucks and mine cars. Use it as a pre-clean prior to inspection or periodic maintenance of ground support equipment related to aircraft operations or building upkeep, and for the heavy duty cleaning associated with engineering industry re-tooling jobs.

### Typical Uses

*Penetone 1107* may be used in soak tanks, steam cleaners or in manual application - spray, sponge, wipe, mop or traditional bucket and brush, depending on existing soil conditions and method of application.

### Directions For Use

For general purpose steam cleaning, use at a concentrate of 1/2 to 1 ounce per gallon at the nozzle. Where possible, pre-wet the entire surface prior to steam cleaning. Clean from the top down for the best results using lowest pressure which will do the job effectively. Hold nozzle close to the surface to insure maximum impingement. Safe for use on all metals and most painted surfaces when used according to directions.

**IMPORTANT:** Before using *PENETONE 1107*, always be sure to read and follow precautions and directions on the product container label and MSDS. (Apr04)
