

PENAIR® M5572B

Aircraft Cleaner (Non-Solvent)

FEATURES/BENEFITS

Features

- Biodegradable
- No petroleum or chlorinated solvents
- Near neutral pH
- QPL to MIL-C-85570 Type II
- CSD-1 approved

Benefits

- Eliminates solvent reporting requirements
- Reduces fire hazards
- Non-corrosive to aircraft metals

Penair M5572B is available in 6 gallon pails, 55 gallon drums, totes and bulk deliveries.

Description

Penair M5572B is an environmentally safe, biodegradable, phosphate-free, non-solvent exterior aircraft cleaner. It is suitable for all painted and unpainted aircraft surfaces.

Penair M5572B has a near neutral pH that reduces skin irritation associated with aircraft wash racks. The unique blend of surfactants in *Penair M5572B* effectively reduces the surface tension of water and soil, allowing deposits to be easily rinsed from aircraft surfaces without streaking.

Directions for Use

For Most Cleaning Operations: Apply *Penair M5572B* by coarse, non-atomizing spray, mop, sponge, cloth or brush at dilution ratios of 1:1 to 1:10 parts water, depending on the application and soils involved. After allowing a short dwell time, agitation by brush or scrub pad and thorough water rinsing will insure complete penetration and removal of stubborn soil deposits.

For Regular Cleaning Of Exhaust Track Areas and Wheel Wells: Dilute 1:1 to 1:2 with water. For particularly oily stains, use in solvent solution. Apply to surface liberally, preferably with a high-pressure sprayer. After a dwell time of 1 to 2 minutes, agitate with scrub pad or brush where necessary, then hose or pressure rinse thoroughly with water.

For Extremely Heavily Oiled Surfaces: Use *Penair M5572B* concentrated or diluted 1:1 with water.

IMPORTANT: Before using *PENAIR M5572B* always be sure to read and follow warnings and directions for use appearing on the product container label, MSDS and applicable current technical manual.
