SECTION 1: IDENTIFICATION

Product name: PENETONE 2406
Recommended use: Cleaner, degreaser
Physical Description: Clear green liquid with glycol ether odor
Generic Ingredients: Water, surfactants, potassium hydroxide, glycol ether, alcohol, and chelate

Manufacturer: Penetone Corporation
125 Kingsland Ave.
Clifton, NJ 07014
800-631-1652 or 201-567-3000

Business Contact:
Customer Service
800-631-1652 x2602 or 2272

Product Safety
800-631-1652 x2211 or 2257

Emergency Phone Numbers: PENETONE 201-567-3000 CHEMTREC 800-424-9300

SECTION 2: HAZARDS IDENTIFICATION

GHS CLASSIFICATION:

Health:
Skin corrosion: 1C
Eye damage: 1
Aspiration hazard: 1

Carcinogenicity: 2

Physical:
Corrosive to metals - 1

DANGER!
Causes Severe Skin Burns and Eye Damage.
May Be Fatal If Swallowed and Enters Airways.
Suspected of Causing Cancer.
May Be Corrosive to Metals.

Precautionary Statements:

Prevention:
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood.

Do not breathe mists if inhalable mists occur during use. Wear protective gloves, clothing, eye protection, and face protection.

Wash hands and exposed skin thoroughly after handling. Keep only in original container.

Response:
If swallowed: Rinse mouth. Do NOT induce vomiting.

If on skin or hair: Take off immediately all contaminated clothing. Rinse skin with water or shower. Wash contaminated clothing before reuse.

If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If inhaled: Remove person to fresh air and keep comfortable for breathing. Immediately call a poison center, doctor, emergency room, or 911.

Absorb spillage to prevent material damage. If exposed or concerned: Get medical advice/attention.

Storage:
Store locked up. Store in corrosive resistant container, plastic (HDPE) is recommended, or container with a resistant inner liner.

Disposal:
Dispose of contents/container in accordance with local, regional, and national regulations (see Sections 13 and 15 of SDS for disposal and reporting requirements).

SECTION 4: FIRST-AID MEASURES

General Description of Symptoms & First-Aid Measures
Most likely workplace exposure routes will be skin contact or inhalation.

For skin contact, typically no immediate effects will be observed. A tingling or burning sensation might be felt some time after exposure. Slight reddening or minor irritation could also develop if product is not quickly washed off.

Inhalation exposure may produce varied effects, particularly if exposure occurs above the recommended workplace exposure limits (see SECTION 8). Typical symptoms could include coughing, sneezing, and a tingling or burning sensation in the nose, throat, and lungs.

Eyes
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center, doctor, physician or other competent medical authority for medical advice. Penetone recommends that after any eye exposure a physician be seen immediately.

Ingestion
If swallowed: Rinse mouth. DO NOT INDUCE VOMITING. Immediately call a poison center, doctor, physician or other competent medical authority for medical advice.

Inhalation
If inhaled: Remove person to fresh air and keep comfortable for breathing. Immediately call a local Poison Control Center, physician, or other competent medical authority for medical advice.

Skin
If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. A mild soap may be used to wash skin. Wash contaminated clothing before reuse. Immediately call a local Poison Control Center, doctor, physician or other competent medical authority for medical advice.

Special Treatment / Other
None

SECTION 5: FIRE FIGHTING MEASURES

Flammable Properties
Classification: Non-flammable
Flash Point: None-to-boil
Autoignition Temperature: Not applicable
Lower Flammable Limit: Not applicable  Upper Flammable Limit: Not applicable
Specific Hazards
Product is water based and presents no unusual fire hazards. Product may react with chemically reactive metals such as aluminum, zinc, magnesium, copper, etc. to release hydrogen gas which can form explosive mixtures in air.

Extinguishing Media
Use extinguishing agents appropriate for controlling surrounding fire.

Unsuitable: None.

Protection & Precautions for Firefighters
Protective Equipment & Clothing: Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters protective clothing will only provide limited protection.

Fire Fighting Guidance: Cool containers with flooding quantities of water until well after fire is out. Move containers from fire area if you can do it safely. Dike fire control water for later disposal; do not scatter material. Containers can expand and explode under fire conditions due to vapor buildup. Always stay away from containers engulfed in fire.

Hazardous Combustion Products: Smoke, fumes, and oxides of carbon, nitrogen, and sulfur when taken to dryness and burned.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Land Spill
Adsorb spillage to prevent material damage. Stop leak if you can do it safely. For large spills, dike and pump into properly labeled containers for reclamation or disposal. For small spill, soak up with absorbent material and place in properly labeled containers for disposal. Neutralize residue with dilute acid and follow with a liberal covering of sodium bicarbonate or other acceptable drying agent.

Water Spill
This is a water based product and will completely mix/dissolve in water making recovery difficult. This product is caustic and will raise the pH of surface waters. Check with local environmental regulatory agencies for reporting requirements.

See SECTION 8 for EXPOSURE CONTROLS and PERSONAL PROTECTION.

SECTION 7: HANDLING & STORAGE

Handling
Avoid contact with eyes, skin and clothing. After handling, always wash hands thoroughly with soap and water. Avoid personal contact with any residue. Do not cut, weld, or reuse empty container.

Storage
Store locked up. Store in corrosive resistant container. Plastic is recommended. If storing in a metal container, it must be NON-ALUMINUM with a resistant inner liner (NOTE: flammable hydrogen gas may be generated if aluminum container and/or aluminum fittings are used). If secondary containers are used, plastic is recommended. Keep container tightly closed when not in use. Do not store near strong bases. Do not store in direct sunlight. Avoid storing above 120°F (49°C).

SECTION 8: EXPOSURE CONTROLS and PERSONAL PROTECTION

Engineering Controls
Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.
Personal Protection

**Inhalation**  A respiratory protection program that meets OSHA’s 29 CFR 1910.134 or ANSI Z88.2 requirements must be followed whenever workplace conditions warrant respirator use. Use of an organic vapor mask or respirator is recommended.

**Skin**  Wear chemical resistant gloves such as: rubber, nitrile, neoprene, or latex when skin contact is possible. Protective clothing including gloves, apron, sleeves, boots, head and face protection should be worn depending on how the product is used. PPE should be cleaned thoroughly after each use.

**Eyes**  Penetone recommends always wearing safety glasses as a minimum in any workplace. Conditions may warrant the use of chemical goggles and possibly a face shield. Consult your standard operating procedure or safety professional for advice. Use protective eye and face devices that comply with ANSI Z87.1-1987.

**Additional Remarks**
Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use.

**Occupational Exposure Limits**

**SECTION 9: PHYSICAL & CHEMICAL PROPERTIES**

**Appearance**: clear green liquid

**Odor**: glycol ether

**Odor Threshold**: not determined

**pH**: >13

**Melting Point / Freezing**: about 25°F

**Boiling Point / Boiling Point Range**: about 212°F

**Flash Point**: not applicable

**Evaporation Rate**: equal to water

**Flammability**: not applicable

**Lower Flammable Limit**: not applicable

**Upper Flammable Limit**: not applicable

**Explosive Properties**: not applicable

**Vapor Pressure**: equal to water

**Relative Vapor Density**: equal to water

**Relative Density**: 1.06

**Solubility (Water)**: soluble in water

**Partition Coefficient (K_{ow})**: not determined

**Auto-ignition temperature**: not applicable

**Decomposition temperature**: not applicable

**Viscosity**: less than 5 centipoise at room temperature
**SECTION 10: STABILITY & REACTIVITY**

**Reactivity**
Product will react with acids, giving off heat.

**Chemical Stability**
Stable.

**Hazardous Reactions**
Mixing with acids will give off heat and may cause splattering. Will react with some metals (see below) forming flammable hydrogen gas. Carbon monoxide gas may form upon contact with reducing sugars, food and beverage products in enclosed spaces.

**Conditions to Avoid**
Corrosive liquid. Do not store near strong acids.

**Incompatible Materials**
Strong acids. Soft metals such as aluminum, brass, bronze, copper, lead, tin, zinc or other alkali sensitive metals or alloys.

**Hazardous Decomposition Products**
Oxides of carbon, nitrogen, and sulfur when taken to dryness and burned.

**SECTION 11: TOXICOLOGICAL INFORMATION**

**Product Summary**
This product contains potassium hydroxide which is corrosive to all tissues. Contact with skin and/or eyes, ingestion, or inhalation of spray mist may be corrosive. Possible effects include severe irritation, burns, and permanent damage to exposed tissues if immediate action is not taken.

**Acute Toxicity:**
- **Dermal:** LD50 > 2,000 mg/kg rabbit (estimated using additivity formula)
- **Inhalation:** No data available
- **Oral:** LD50 > 2,000 mg/kg rat (estimated using additivity formula)

**Skin Corrosion/Irritation**
Corrosive. Causes skin burns. Prolonged or repeat skin exposures can result in dermatitis.

**Serious Eye Damage/Irritation**
Corrosive. Causes serious eye damage which can result in severe irritation, pain and burns, and permanent damage including blindness.

**Sensitization - Respiratory or Skin**
No data available for the product. Based upon components, product is not expected to be a respiratory or skin sensitizer.

**Germ Cell Mutagenicity**
No data available for the product. Based upon components, product is not expected to result in germ cell mutagenicity.

**Carcinogenicity**
Ethylene glycol monobutyl ether is listed by ACGIH as Group A3: Confirmed animal carcinogen with unknown relevance to humans. Available evidence does not suggest that the agent is likely to cause cancer in humans except under uncommon or unlikely routes or levels of exposure; and by IARC as Group 3: not classifiable as to its carcinogenicity to humans.
Coco diethanolamide is listed by IARC as Group 2B: possibly carcinogenic to humans.

**Reproductive/Developmental Toxicity**
No data for the product. Insufficient data for the components to evaluate. Given the product's tissue corrosiveness, other more pronounced effects would be seen making evaluation of reproductive toxicity unlikely.

The nonionic surfactant used in this product has produced effects in the fetus only at levels that were toxic to the parent animals.

2-Butoxyethanol has been toxic to the fetus in lab animals at doses toxic to the mother. Effects on reproduction have been seen only at doses that produced significant toxicity to the parent animals.

**Specific Target Organ Effects - Single Exposure**
No data.

**Specific Target Organ Effects - Repeated or Prolonged Exposure**
No data for the product. Insufficient data for the components to evaluate.

The nonionic surfactant used in this product exhibited kidney and liver effects in lab animals at high feeding levels over extended periods of time.

Diethylene glycol butyl ether: Effects on the kidney, liver, and blood were found in lab animals at high feeding levels over extended periods of time.

2-Butoxyethanol has caused effects on the blood (hemolysis) and kidney and liver effects in lab animals. Small but statistically significant increases in tumors were observed in mice but not rats. These effects are not believed to be relevant to humans.

**Aspiration Hazard**
Based upon available data, if swallowed, may pose a lung aspiration hazard during vomiting. Lung aspiration may result in chemical pneumonitis, pulmonary edema, and damage to lung tissue or death.

---

**SECTION 12: ECOLOGICAL INFORMATION**

**Product Summary**
This material is alkaline and may raise the pH of surface waters with low buffering capacity. Product should be considered toxic to aquatic organisms. (Acute aquatic toxicity category 3 by European Union classification).

**Ecotoxicity**
LC50/EC50 10-100 mg/l (estimated using additivity formula)

**Persistence and Degradability**
Potassium hydroxide will dissociate into its ionic form in the aquatic environment. Natural carbon dioxide will slowly neutralize it. The organic materials range in degradability from inherently to readily biodegradable.

**Bioaccumulative Potential**
Bioaccumulation potential of the materials used in this product are low.

**Other Adverse Effects**
Potassium hydroxide has exhibited slight toxicity to terrestrial organisms.

---

**SECTION 13: DISPOSAL CONSIDERATIONS**

Product is a D002 Corrosive Hazardous Waste under RCRA definitions. Dispose of contents/container in accordance with all applicable federal, state, and local regulations.
Note: Contaminated product, soil, water, container residues and spill cleanup materials may be hazardous wastes. Appropriate hazardous waste designation is the responsibility of the user.

SECTION 14: TRANSPORT INFORMATION

ID No.: UN1814
Proper Shipping Name: POTASSIUM HYDROXIDE, solution
Hazard Class: 8
Packing Group: III
Label: CORROSIVE
Marine Pollutant: No
RQ: 25,000 lbs (about 2,800 gallons) of product for potassium hydroxide
Special Precautions: none

SECTION 15: REGULATORY INFORMATION

TSCA
The ingredients in this product are listed on the TSCA inventory.

NEW JERSEY RIGHT-TO-KNOW INFORMATION
This product contains water (CAS# 7732-18-5), potassium hydroxide (CAS# 1310-58-3), sodium alkylnaphthalene sulfonate (CAS# 27178-87-6), ethoxylated nonylphenol (CAS# 127087-87-0), 2-butoxyethanol ether (CAS# 111-76-2), isopropanol (CAS# 67-63-0), and coco diethanolamide (CAS 68603-42-9).

CALIFORNIA PROPOSITION 65 INFORMATION
This product contains a chemical recognized by the state of California to cause cancer: coco diethanolamide (CAS# 68603-42-9).

SCAQMD INFORMATION
Is there a photochemically reactive material present? No
What is the % by volume of photochemically reactive material? 0
What is the VOC content? 50 g/l
What is the vapor pressure of VOC’s? Less than 10 mm Hg @ 20°C
