SECTION 1: IDENTIFICATION

Product name: PENETONE 19B
Recommended use: Gas turbine compressor cleaning
Physical Description: Clear amber liquid with mild solvent odor
Generic Ingredients: Water, surfactants, aromatic hydrocarbons and other solvents

Manufacturer: Penetone Corporation
125 Kingsland Ave.
Clifton, NJ 07014
800-631-1652 or 201-567-3000

Business Contact:
Customer Service
800-631-1652 x2602 or 2272
Product Safety
800-631-1652 x2211 or 2257

Emergency Phone Numbers: PENETONE 201-567-3000 CHEMTREC 800-424-9300

SECTION 2: HAZARDS IDENTIFICATION

GHS CLASSIFICATION:

<table>
<thead>
<tr>
<th>Health</th>
<th>Physical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin irritation: 2</td>
<td>Flammable liquid: 4</td>
</tr>
<tr>
<td>Eye irritation: 2A</td>
<td></td>
</tr>
<tr>
<td>Carcinogenicity: 1</td>
<td></td>
</tr>
</tbody>
</table>

Specific target organ toxicity - single exposure: 3
Aspiration hazard: 1

DANGER!
May Be Fatal If Swallowed and Enters Airways.
Causes Skin and Serious Eye Irritation.
May Cause Drowsiness or Dizziness.
Combustible Liquid.

Precautionary Statements:

Prevention:
Obtain special instruction before use. Do not handle until all safety precautions have been read and understood.
Avoid breathing fumes, vapors or mists if inhalable mists occur during use. Use only outdoors or in a well-ventilated area.
Wear protective gloves, eye protection, and face protection. Wash hands and exposed skin thoroughly after handling.
Keep away from flames and hot surfaces. No smoking.

Response:
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. A mild soap may be used. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice/attention.

If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a poison center, doctor, emergency room or 911 if you feel unwell.
If swallowed, immediately call a poison center, doctor, emergency room, or 911. Do NOT induce vomiting.
In case of fire: Use dry chemical, carbon dioxide, water spray, water fog, or foam. Do not use solid water stream as this may spread the fire.
If exposed or concerned: Get medical advice/attention.

Storage:
Store locked up. Store in a well-ventilated place. Keep container tightly closed.

Disposal:
Dispose of contents/container in accordance with local, regional, and national regulations (see Sections 13 and 15 of SDS for disposal and reporting requirements).

SECTION 4: FIRST-AID MEASURES

General Description of Symptoms & First-Aid Measures
Most likely work-place exposure routes will be skin contact or inhalation.

For skin contact, typically no immediate effects will be observed. Slight reddening or minor irritation could develop some time after exposure if product is not quickly washed off. For sensitive individuals, a rash may appear.

Inhalation exposure may produce varied effects, particularly if exposure occurs above the recommended workplace exposure limits (see SECTION 8). Typical symptoms would include headaches, dizziness, and drowsiness. In extreme cases, unconsciousness and other central nervous effects may occur.

Eyes
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists or develops: Get medical advice or attention. Penetone recommends that after any eye exposure a physician be seen immediately.

Ingestion
If swallowed: Immediately call a poison center, doctor, physician or other competent medical authority. Rinse mouth. Product presents an aspiration hazard. DO NOT INDUCE VOMITING.

Inhalation
If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a poison center, doctor, physician or other competent medical authority if you feel unwell.

Skin
If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. A mild soap may be used to wash skin. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice or attention.

Special Treatment / Other
None

SECTION 5: FIRE FIGHTING MEASURES

Flammable Properties
Classification: 4
Flash Point: 155°F PMCC
Autoignition Temperature: not determined
Lower Flammable Limit: not determined  Upper Flammable Limit: not determined

Specific Hazards
Combustible liquid. Can form combustible mixtures at or above the flash point. Although the product is combustible, it is water based and water dilutable and will self extinguish with addition of water.
**Extinguishing Media**

**Suitable:** SMALL FIRE: Use dry chemical, carbon dioxide (CO₂), water spray or regular foam.  LARGE FIRE: water spray, water fog, or foam.

**Unsuitable:** Do not use solid water stream as this may spread fire.

**Protection & Precautions for Firefighters**

**Protective Equipment & Clothing:** Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters protective clothing will only provide limited protection.

**Fire Fighting Guidance:** Cool containers with flooding quantities of water until well after fire is out. Move containers from fire area if you can do it safely. Dike fire control water for later disposal; do not scatter material. Containers can expand and explode under fire conditions due to vapor buildup. Always stay away from containers engulfed in fire.

**Hazardous Combustion Products:** Smoke, fumes, and oxides of carbon and nitrogen.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

**Land Spill**

Eliminate sources of ignition. Do not touch or walk through spilled material. Stop leak if you can do it safely. For large spills, dike and pump into properly labeled containers for reclamation or disposal. For small spill, soak up with absorbent material and place in properly labeled containers for disposal.

**Water Spill**

Product forms emulsion with water which may make cleanup difficult. Avoid agitation to minimize emulsion formation. Remove product from water surface by skimming or with suitable absorbents. Put into properly labeled containers for reclamation or disposal. If allowed by local environmental regulatory agencies, you may use a suitable dispersant. Check with local environmental regulatory agencies for reporting requirements.

*See SECTION 8 for EXPOSURE CONTROLS and PERSONAL PROTECTION.*

### SECTION 7: HANDLING & STORAGE

**Handling**

Do not handle near heat, sparks, or flame. Avoid contact with oxidizing agents. Use only with adequate ventilation/personal protection (SEE section 8). Avoid contact with eyes, skin and clothing. After handling, always wash hands thoroughly with soap and water. Avoid personal contact with any residue. Dispose of empty containers with care. Empty containers can contain flammable residue and explosive vapors. *Do not cut, weld, or reuse empty container.*

**Storage**

Store in a well-ventilated place. Keep container tightly closed. Store locked up. Do not store near heat, sparks, open flame, or other ignition sources. Do not store near strong oxidizing agents. Do not store in direct sunlight. Avoid storing above 120°F (49°C).

### SECTION 8: EXPOSURE CONTROLS and PERSONAL PROTECTION

**Engineering Controls**

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits.

**Personal Protection**

*Inhalation* A respiratory protection program that meets OSHA’s 29 CFR 1910.134 or ANSI Z88.2 requirements must
be followed whenever workplace conditions warrant respirator use. Use of an organic vapor mask or respirator is recommended.

Skin Wear chemical resistant gloves such as: rubber, nitrile, neoprene, or latex when skin contact is possible. Protective clothing including gloves, apron, sleeves, boots, head and face protection should be worn depending on how the product is used. PPE should be cleaned thoroughly after each use.

Eyes Penetone recommends always wearing safety glasses as a minimum in any workplace. Conditions may warrant the use of chemical goggles and possibly a face shield. Consult your standard operating procedure or safety professional for advice. Use protective eye and face devices that comply with ANSI Z87.1-1987.

Additional Remarks
Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the hazards and/or potential hazards that may be encountered during use.

SECTION 9: PHYSICAL & CHEMICAL PROPERTIES

Appearance: clear amber liquid
Odor: mild solvent
Odor Threshold: not determined
pH: about 7
Melting Point / Freezing: about 30°F
Boiling Point / Boiling Point Range: about 212°F
Flash Point: 155°F PMCC
Evaporation Rate: equal to water
Flammability: not applicable
Lower Flammable Limit: not determined
Upper Flammable Limit: not determined
Explosive Properties: not applicable
Vapor Pressure: equal to water
Relative Vapor Density: not determined
Relative Density: 0.99
Solubility (Water): forms emulsion (separate in one to 12 hours)
Partition Coefficient ($K_{ow}$): not determined
Auto-ignition temperature: not determined
Decomposition temperature: not determined
Viscosity: 10-50 centipoise at room temperature

SECTION 10: STABILITY & REACTIVITY

Reactivity
Product is stable and only reactive under extreme conditions (very high heat/pressure) or in the presence of specific incompatible materials (see below).

**Chemical Stability**

Product is stable.

**Hazardous Reactions**

Hazardous polymerization will not occur.

**Conditions to Avoid**

Combustible liquid. Do not store near sources of heat, sparks, open flame, or other ignition sources.

**Incompatible Materials**

Strong oxidizing agents.

**Hazardous Decomposition Products**

Carbon monoxide and dioxide and nitrogen oxides and phosphates when taken to dryness and burned.

### SECTION 11: TOXICOLOGICAL INFORMATION

**Product Summary**

Product is irritating to the skin and eyes. Vapor/aerosol concentrations above recommended exposure levels are irritating to the eyes and respiratory tract, and may cause headaches, dizziness, drowsiness, unconsciousness and other central nervous system effects.

**Acute Toxicity:**

- **Dermal:** Rabbits, LD50 > 4,000 mg/kg (estimated using additivity formula)
- **Inhalation:** no data available
- **Oral:** Rats, LD50 > 2,000 mg/kg (estimated using additivity formula)

**Skin Corrosion/Irritation**

Product when tested as a whole was only mildly irritating.

**Serious Eye Damage/Irritation**

Based upon component data, product as a whole may cause moderate to serious eye irritation.

**Sensitization - Respiratory or Skin**

Based upon component data, not expected to be a skin sensitizer.

**Germ Cell Mutagenicity**

No data available

**Carcinogenicity**

No data available

**Reproductive Toxicity**

No data available.

The nonionic surfactant used in this product has produced effects in the fetus only at levels that were toxic to the parent animals.

Hexylene glycol delayed development of the fetus at doses that were toxic to the mother animal.

**Specific Target Organ Effects - Single Exposure**

No data available.

**Specific Target Organ Effects - Repeated or Prolonged Exposure**

No data available.
The aromatic hydrocarbon caused kidney effects in male rats which are not considered relevant to humans.

Hexylene glycol produced effects on the kidney, liver, stomach, and irritation of gastric mucosa in rats. However no significant impairment of function was observed.

**Aspiration Hazard**

Based upon available data and comparison to similar materials, if swallowed, may pose a lung aspiration hazard during vomiting. Lung aspiration may result in chemical pneumonitis, pulmonary edema, and damage to lung tissue or death.

**SECTION 12: ECOLOGICAL INFORMATION**

**Product Summary**

Product is expected to be toxic to fish, aquatic invertebrates, algae, and microorganisms. (Acute aquatic toxicity category 2 by European Union classification).

**Ecotoxicity**

LC/EC/IC 1-10 mg/l (estimated using additivity formula)

**Persistence and Degradability**

Based upon component data, product is expected to be inherently biodegradable.

**Bioaccumulative Potential**

No data available for the product. Aromatic solvent used in this product has the potential to bioaccumulate.

**Mobility in soil**

No data available for the product. Product is a complex mixture. Components will partition into water and soil phases depending on inherent solubility of component in water.

**Other Adverse Effects**

None known

**SECTION 13: DISPOSAL CONSIDERATIONS**

Nonhazardous waste. Dispose of contents/container in accordance with all applicable federal, state, and local regulations.

*Note:* Contaminated product, soil, water, container residues and spill cleanup materials may be hazardous wastes. Appropriate hazardous waste designation is the responsibility of the user.

**SECTION 14: TRANSPORT INFORMATION**

(1) Releases exceeding the RQ just be reported to the National Response Center, 800-424-8802 and may be subject to state and local reporting.

(2) CERCLA hazardous substance with no assigned RQ

**NEW JERSEY RIGHT-TO-KNOW INFORMATION**
This product contains water (CAS# 7732-18-5), alcohol ethoxylate (CAS# 68439-50-9), aromatic hydrocarbon (CAS# 64742-94-5), hexylene glycol (CAS# 107-41-5), and triethanolamine poly(oxy-1,2-ethanediyl), (C10-14)-alkyl-hydroxy-, phosphate(CAS# not available).

**CALIFORNIA PROPOSITION 65 INFORMATION**
This product does not contain chemicals recognized by the state of California to cause cancer and/or birth defects or reproductive harm.

**SCAQMD INFORMATION**
Is there a photochemically reactive material present? Yes
What is the % by volume of photochemically reactive material? 15-20
What is the VOC content? 280 g/l
What is the vapor pressure of VOC's? 0.03 mm Hg @ 20°C
