

RESEARCH and development...

With over 100 years of manufacturing and product development experience, the West Penetone family of companies has developed and patented a number of products designed to satisfy the needs of its numerous clients throughout the world. Whatever cleaners, degreasers or decontamination products may be required, we offer a broad range of products that meet the highest standards of safety and efficacy.

Concerned as we always are about environmental impact, we have introduced a new line of "green" cleaners and degreasers as well as super concentrated formulas for a dramatic reduction of packaging.

Looking for a product to meet a specific need?

Our team of experts can develop products that will answer your requirements.

Implementation of chemical application procedures by our technical team allows you to carry out your cleaning operations while ensuring a safe environment.

West Penetone has products for these pipeline industry needs: Conversion / Contamination / Corrosion

- Arsenic
- Asphaltene
- Benzene
- Carbon black
- Carbonized deposits
- Gelled oils
- Iron sulfide
- Lubes
- Mercury
- NORM
- Paraffins
- PCB's
- Pipe varnish
- Silicon
- Sludge
- Solidified grease
- Tar
- Teflon dust
- Tube turn coating
- Waste fats

Our complete line of chemical cleaning products including our Citrikleen line, are formulated to provide the maximum in safety and performance, outperforming conventional cleaners.

The "Penetone Process" developed by West Penetone, in cooperation with major pipeline contractors, has been approved by many large pipeline companies. The "Penetone Process" provides fast and effective cleaning with proven results.

Our chemical cleaning trains are designed to clean your pipelines in one pass, thus reducing manpower and downtime to get the pipeline back into service.

A typical cleaning train will contain a brush pig, two cleaning batches and a rinse batch, followed by drying and purging as needed. Using our biodegradable products reduces the amount of hazardous waste generated in removing contaminants from the pipeline.

Your cleaning
solutions resource

TYPE	PRODUCT	DESCRIPTION	TRANSMISSION TYPE		CLEANING PROCEDURE			
			CRUDE	GAS	PRE-COMMISSIONING	ABANDONMENT/ DE-COMMISSIONING	INSPECTION/ CONVERSION	PRESERVATION
Aqueous Cleaners	POWER CLEANER 155	Concentrated liquid alkaline cleaner used for removing PCB's as well as grease, oil, and grim quickly and safely.		X			X	
	SLIX	Surfactant-based cleaner used to clean crude-type fouling and other organic compounds and reduce hazardous waste on the pig train receiving end.	X	X	X		X	
Biocides	PENETONE 7050M	Glutaraldehyde-based bacterial control with good ecotoxicological profile for environmentally sensitive areas.	X	X		X		X
	PENETONE 7052M	THPS-based bacterial control agent for persistent and long-term control.	X	X		X		X
Corrosion Inhibitors	PENETONE 2010C	Water-miscible "packer fluid" to protect against bacterial, dissolved oxygen and acid gas attack as well as other forms of electrolytic corrosion during abandonment.	X	X		X		X
	PENETONE 2012C	Oil-soluble, tenuous film-forming batch corrosion inhibitor designed for severely corrosive environments.	X	X		X		X
	WESTOP 480	Water-based corrosion inhibitor designed to protects iron, steel and other ferrous alloys following immersion and exposure to open air.	X	X		X		X
Degreasers	CITRIKLEEN HD	Solvent-emulsion degreaser used to clean grease, carbon, solidified grease, gelled oils, specialty lubes, teflon dust, pipe varnish, tube turn coating, choride salts, and iron sulfides.	X	X	X	X	X	
	CITRIKLEEN XPC	Solvent degreaser used to impart higher solvency in removing paraffins, asphaltenes, and high molecular weight petroleum deposits.	X				X	
Flow Assurance	PENETONE 4022PS	Desludging additive designed to aid in the softening, dispersion, and removal of wax and sludge deposition in tank and pipeline cleaning applications.	X			X		
	PENETONE 7302M	Oil-soluble, surfactant-based friction reducer and desludging additive designed to improve wax and asphaltene dispersion as well as prevent re-deposition in pipeline cleaning applications.	X			X		
O ₂ Scavenger	PENETONE 7010M	Bisulfite-based oxygen scavenger effective at removing dissolved oxygen to reduce corrosion and to deactivate residual chemical applications	X	X		X		X
Scale & Oxide Removal	PL998	Versatile acid-based cleaner with heavy duty detergent and metal conditioning properties for use in production and maintenance applications.		X	X	X	X	
	WEDAC	High-foaming acid cleaner designed to remove scale and rsuts as well as resotre oxidized surfaces and prime metallic surfaces for coating.		X	X	X	X	

West Penetone has over 60 years of cleaning/degreasing experience and is dedicated to addressing the cleaning requirements of the pipeline industry. Our highly trained staff will analyze your process and recommend just the right product and procedure to meet your process demands. We'll then provide on-going technical support to make sure you get the most out of our products. Consult your local West Penetone sales representative to discuss products used for remediating tertiary issues related to the pipeline pigging process.
