

RESEARCH *and development...*

With over 100 years of manufacturing and product development experience, the West Penetone family of companies has developed and patented a number of products designed to satisfy the needs of its numerous clients throughout the world. Whatever cleaners, degreasers or decontamination products may be required, we offer a broad range of products that meet the highest standards of safety and efficacy.

Concerned as we always are about environmental impact, we have introduced a new line of "green" cleaners and degreasers as well as super concentrated formulas for a dramatic reduction of packaging.

Looking for a product to meet a specific need?
Our team of experts can develop products that will answer your requirements.

Implementation of chemical application procedures by our technical team allows you to carry out your cleaning operations while ensuring a safe environment.

Products**

Your cleaning
solutions resource

Type	Product	Description	Application		
			Tank Cleaning	Fluid Hauling/ Disposal	Waste Handling/ Treatment
Degreaser	CITRIKLEEN HD	CITRIKLEEN HD is versatile and highly concentrated industrial degreaser that is safe for a variety of metal surface cleaning applications. It can be effectively applied in a range of applications including chemical circulation procedures in vessels and sludge fluidization in tanks.	X		
	RAMSOL BCX	RAMSOL BCX is a heavy duty solvent blend designed for chemical circulation procedures where the removal of asphaltenes and resins is required from lines and vessels and for general sludge fluidization.	X		
Diluent	PENETONE 4020	PENETONE 4020 is a cost-effective diluent option for tank cleaning procedures where cutter stock or on-site diluent options are unavailable.	X		
Emulsion Separation	PENETONE 1000D SERIES	The PENETONE 1000D series are both water and oil soluble demulsifiers designed to resolve difficult or tight emulsion in treaters and tanks. These products provide rapid water drop, reduced BS&W, and a polished top oil.			X
Foam Control	DEFOAMER	DEFOAMER is a high-performance antifoam emulsion for use in water-based foam control. It provides excellent foam knockdown and durability at low concentrations while providing homogenous dilutions with virtually no oiling or agglomerates.		X	X
Hot-watering Additive	LEMON LITE INDUSTRIAL	LEMON LITE INDUSTRIAL is a general purpose degreaser additive designed for the fluidization and removal of low molecular weight oils and sludge.	X		
	PENETONE 4038P	PENETONE 4038P is a hot watering additive designed to wet, soften, disperse, and inhibit or prevent wax deposition in batch treatments. The product forms a temporary emulsion in most water sources to effectively liquefy paraffin deposits and subsequently allow for phase separation to reclaim the water source for continuous	X		
Hydrogen Sulfide Control	PENETONE 8500H SERIES	The PENETONE 8500H series are hydrogen sulfide scavengers with a vast array of properties. Highly effective at removing H ₂ S from gas streams, oil, slop oil, water, and sludge. These products are available in water and oil soluble forms as well as with no added formaldehyde.	X		X
	PENETONE 8010WTS	PENETONE 8010WTS is a 40% by weight solution of sodium nitrite formulated for water treatment processes requiring the remediation of high H ₂ S concentrations.		X	X
Paraffin / Asphaltene Dispersion	PENETONE 4000P SERIES	The PENETONE 4000P series promote remediation of a variety of paraffin problems by providing solvency, dispersion, inhibition, and drag reduction. These products can be applied in a variety of settings including tank cleaning and flow assurance.	X		
	PENETONE 7302M	PENETONE 7302M is a heavy-duty solvent additive be used to improve asphaltene dispersion as well as prevent re-deposition. The product also provides viscosity control and drag reduction pumping low API gravity material in tank cleaning as well as in flow assurance applications.	X		
Solids / Sediment Control	PENETONE 7101M	PENETONE 7101M is an effective conditioner for a variety of liquid/solids treatment or reverse emulsion water clarification processes including the maintenance of reuse quality standards.			X
	PENETONE 7201A	PENETONE 7201A is a polymeric dispersant designed to offer a combination of antiscaling, sequestration and dispersing properties for management of solids in tank fluids or other industrial cleaning applications.			X
