

Our presence in several industries is explained by our desire to understand the specific needs and to provide customized solutions.

The petrochemical sector presents significant challenges to which West Penetone has responded with products that exceed expectations.

We have created for this industry an innovative and highly efficient line of green products based on a natural solvent, d-limonene. This component is the basis for the **CITRIKLEEN** product line that has been quickly adopted by our customers thanks to its unique and inimitable qualities.

Visit **www.westpenetone.com** and consult our complete line of products designed for the **Oil & Gas Industry**.

RESEARCH *and development...*

With over 100 years of manufacturing and product development experience, the West Penetone family of companies has developed and patented a number of products designed to satisfy the needs of its numerous clients throughout the world. Whatever cleaners, degreasers or decontamination products may be required, we offer a broad range of products that meet the highest standards of safety and efficacy.

Concerned as we always are about environmental impact, we have introduced a new line of "green" cleaners and degreasers as well as super concentrated formulas for a dramatic reduction of packaging.

Looking for a product to meet a specific need?

Our team of experts can develop products that will answer your requirements.

Implementation of chemical application procedures by our technical team allows you to carry out your cleaning operations while ensuring a safe environment.

The West Penetone S.T.A.R. Team

The West Penetone S.T.A.R. Team

Our technical group provides our customers effective support to ensure that known contaminants are paired with the right chemistry for any task. Establishing and maintaining a collaborative approach with our customers in tackling their operational and maintenance challenges is key to realizing efficiencies and cost savings.

Shutdowns and Turnarounds

When a plant temporarily halts its operations to carry out maintenance on its equipment, every minute counts. These operations must be accomplished with the greatest efficiency in order to avoid wasting precious time and affecting profitability.

In order to meet and exceed these demanding conditions, West Penetone has set up detailed and comprehensive programs for the maintenance of refining, gas, petrochemical plants. These programs define the equipment and products to be used, as well as the exact procedures for carrying out all the operations efficiently and with complete safety.

Our S.T.A.R. Team assists in:

- Shutdown planning
- Developing decontamination program documents
- Plant walk through, pre-mobilization
- Onsite technical supervision/testing
- Lab support

West Penetone provides consulting services that are just as efficient as its products. Our experts work with you to understand your needs and then optimally plan and oversee these operations in accordance with the required deadlines.

Sludge, asphaltene, crude oil, bitumen, H₂S, LEL, benzene, scale and iron sulfides are controlled or eliminated by our full range of chemical technologies.

West Penetone is a partner in your success that works with you and for you!
